

Activity to play and learn at home.

## Find The Number

It is a game to work on concentration and memory, also to learn how to make good use of scissors, identify geometric shapes, count and recognize the shapes of numbers.

Materials:

- \_ construction paper,
- \_ clothespins,
- \_ scissors,
- \_ crayons, or markers.

\_ We can start by talking about the geometric figures and numbers they know, showing the materials they will use for the game.

\_ Remembering the care that we must have when using the scissors and showing them the correct way to use it.

\_ We start the game by making paper figures in the shape of a triangle.

\_ Then draw the number of points you choose on the triangles, preferably up to the number 8 or 10.

\_ Write and model the quantity in number on the clothespins.

\_ Then they play by placing or matching the number of points on each triangular figure with the number on the clamps.

\_ Warn the children that the idea of this game is to have fun, so if they are not correct when placing the number, it's okay.

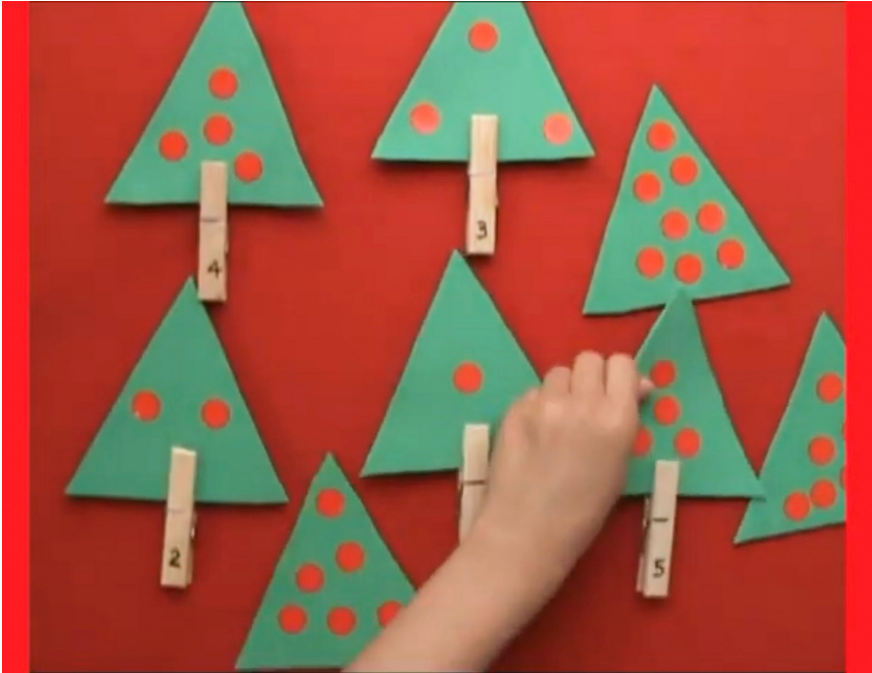

Keep playing, have fun.
