

This is the start of a book for letters only.

*Learning letters is the beginning of literacy. It is also for recognition, naming and sounding.

Materials: Colored construction paper, markers, glue and scissors.
(Magazine pages)

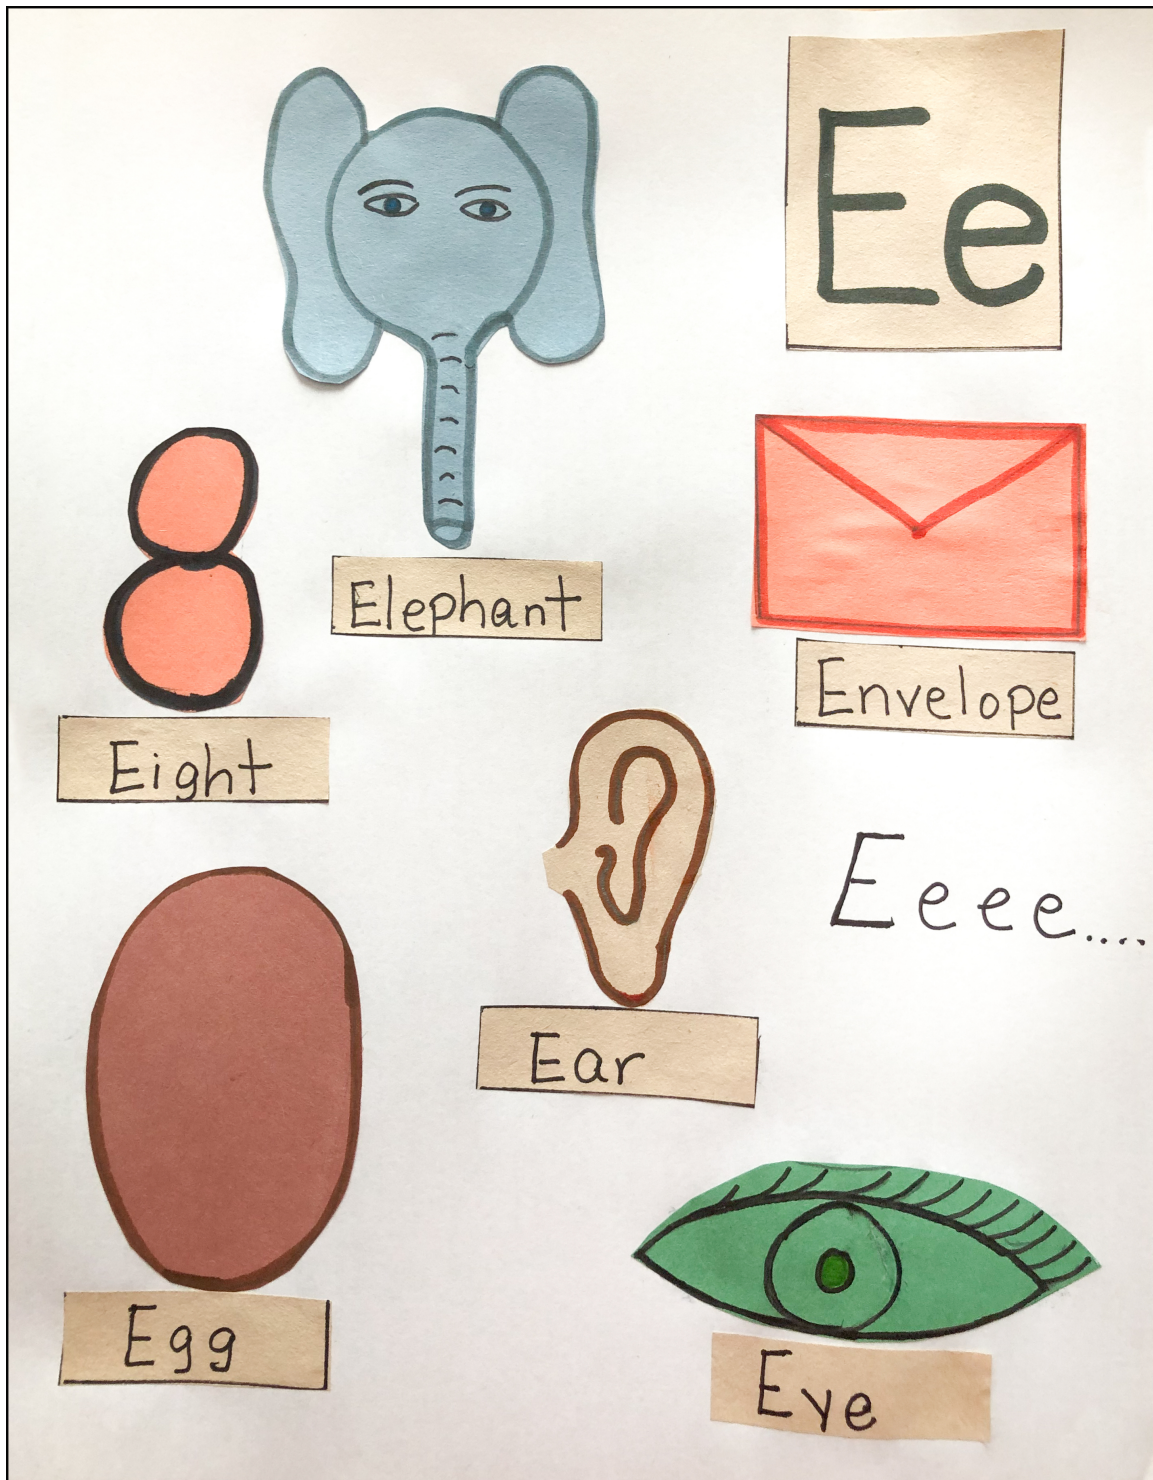

Step 1: Draw or cut out 5 or 6 pictures that begin with the letter Ee, liked elephant, egg, envelope, eye, #8 and eye. Set them aside and go to the next step.

When you are doing this activity do not say Ee is for eye. Say eye begins with Ee.

Step 2: On one piece of paper write the letter Ee on a corner of the paper. Carefully glue your cut up pictures on the page. Leave space around each picture and let them dry for half an hour.

Step 3: Cut up small rectangular pieces of paper and write down the names of each picture. Glue them next to each corresponding picture.

*! Without letters we would have no books, no one would learn to read and we could not sing the ABC's song. Children can begin to learn letters in order or not in order.

This is the start of a Book of Colors

* Colors are important in that we are surrounded by colors. Colors make the world bright, happy, and beautiful.

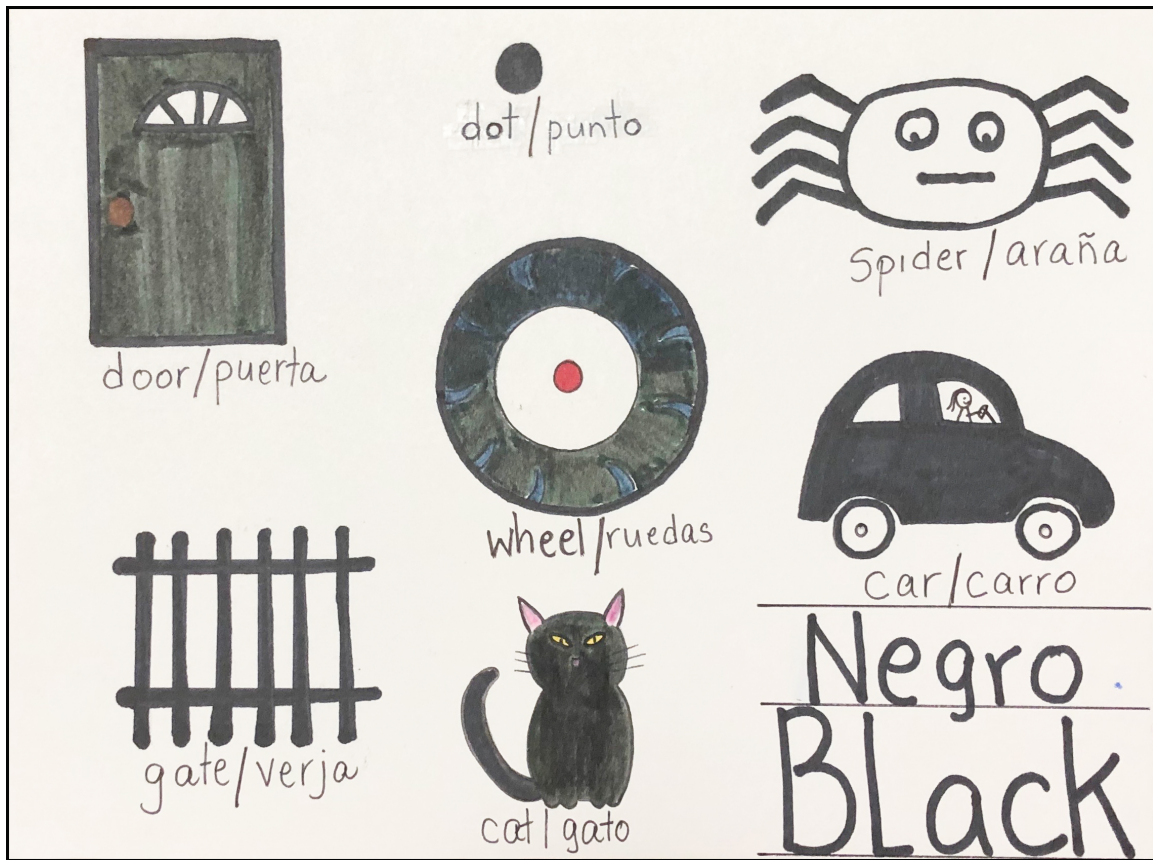

Materials: Markers in black and white construction paper.

Step 1: First think of the color black. Then think of things that are black, come in black and can be turn into black. Things like black door, a dot, spider, a gate, wheel, car and cat .

Step 2: Of the things you thought, begin to draw them and then color them in black on the white paper.

Step 3: When you have completed your drawing, write the names of the drawings next to them and then write the word **Black** in one corner.

*! Colors come in different shades and shapes. You can do wonders when you use colors in your art. Your mind can work wonders as it thinks.

Science Experiments

1. Rain Cloud in a Cup

Fill a clear cup with water half way. Then spray shaving crème all the way to the top of the cup with water. Dilute blue food coloring in water. Use a dropper to put some blue water on top of the shaving crème. You will see the shaving crème look like a rain cloud full of water.

2. Walking water

This experiment needs to be set in a place where it cannot be touched or moved. Take five clear plastic cups and fill 3 of them with up to 3/4 of water. Set them in a straight line touching each other. On the first cup put 4 drops of blue dye, the second empty cup no dye, the third cup put 4 drops of yellow dye, the fourth cup empty no dye and the fifth cup 4 drops of red dye. Take four paper towels and fold them in half and then again the long way. With the first paper towel put one end in the blue dye cup and the other end in the clear empty cup next to it. Take the second paper towel put one end in the clear empty cup and the other end in the yellow. With the third paper towel put one end in the yellow cup and the other in the clear empty cup. The fourth and last paper towel put one end in the clear empty cup and the other end in the red.

Observe to see what happens!
